Best Online Shops 2022

Methodology
Methodology

Summary

The Best American Online Shops were identified after passing a number of tests based on 51 objective and subjective criteria. First, a list of more than 9,500 online shops in the United States was compiled using Statista and online databases, online directories and price comparison websites to identify the most relevant online shops. The online shops with the most American visitors in 2020-2021 were selected as candidates for further evaluation. Online shops selling mainly digital goods (ex: airbnb.com, netflix.com), subscription-based shops, C2C marketplaces (e.g. ebay.com), B2B online shops, showcase websites and online shops that do not display their site in English were excluded from further evaluation to allow a better comparison between them. The online shops were then organized according to their main product offering into 39 categories (see slide 5).

The online shops that passed the initial screening were then tested one by one in 41 objective criteria and 10 subjective criteria on 7 dimensions:

- Structure & Usability
- Trust & Security
- Service & Communication
- Payment
- Purchase & Delivery
- Technical Performance
- Likelihood of Purchase

Alongside the objective test, an online survey of a panel of approximately 6,000 American online shoppers was conducted to assess the appearance of the online shops on 10 subjective criteria (e.g. “The homepage is very clear and well structured”).

After the test phase was over, a sub-score for each dimension was calculated. Based on these results, a score out of 10 was determined for each online shop.

The top 1,000 online shops with the highest scores were then awarded “Best Online Shops 2022” and listed on the Newsweek website. The top 5, 10 or 20 per category has been selected for the print edition based on category size.
Every online shop has been tested by professional testers and rated by consumers

7 dimensions evaluated for each online shop both objectively and subjectively

- Trust & Security
- Likelihood Purchase
- Technical Details
- Payment
- Structure & Usability
- Service & Comm.
- Purchase & Delivery
Examples of criteria evaluated on the 7 dimensions
Every shops tested in the 7 dimensions that make for a well-rounded online shop

41 Objective criteria
Data collection through professional testers

10 Subjective criteria
Online survey conducted by more than 6,000 American online shoppers

Trust & Security
Layout
Company information
SSL
• Is it possible for the customer to see evidence or references to security (SSL)?
• How confidence-inspiring does the shop appear?

Structure & Usability
Webpage Design
Search Bar
Product Display
• How highly do the online shoppers rate the site layout as well as the site structure?
• How functional and user-friendly is the online shop?

Payment
Accepted payment methods
• Does the online shop have an overview of the payment methods available?
• Which payment methods are offered by the online shop?

Purchase & Delivery
Shipping costs
Returns
Purchasing process
• Does the online shop offer express delivery?
• Is it possible to get free delivery?
• Do you need to log in to place an order?

Service & Communication
Contact information
